

# Call for Papers

## *Advances in Econometrics, Volume 37*

### **Spatial and Spatiotemporal Econometrics**

The prevalence and importance of spatial and spatiotemporal data have led to a demand for innovative econometric analysis to produce insights of interest to economists and others. Possible topics include:

- discrete regressands
- aspects of panel data
- simultaneous equations
- sample selection models
- interesting applications
- model uncertainty
- identification issues
- Bayesian methods

Papers chosen will appear in *Advances in Econometrics, Volume 37: Spatial and Spatiotemporal Econometrics*. The volume will be edited by Badi Baltagi, James LeSage, and Kelley Pace.

Please e-mail extended abstracts or complete papers no later than July 15, 2015, to:

Badi H. Baltagi, Syracuse University, [bbaltagi@maxwell.syr.edu](mailto:bbaltagi@maxwell.syr.edu)

James P. LeSage, Texas State University, [james.lesage@txstate.edu](mailto:james.lesage@txstate.edu)

R. Kelley Pace, LSU, [kelley@spatial.us](mailto:kelley@spatial.us)

Decisions on submitted manuscripts will occur by August 15, 2015.

Submissions to the Call for Papers will also be considered for presentation at a special conference to be held on October 9-11, 2015 at the Lod and Carole Cook Conference Center ([www.thecookhotel.com](http://www.thecookhotel.com)) on the Louisiana State University campus in Baton Rouge, Louisiana. Financial support to attend the conference will be provided to the authors chosen to present their papers at the conference.
